A. J. Welch, at 11 o'clock this morning, at Saleroom, will sell Groceries, Liquors, Ale, Wooden Ware, Dry Goods, etc.

J. A. McCree, on Union Wharf, at 11 o'clock this morning, will sell Pears and Grapes.

LATEST FROM CARIBBOO.

ARRIVAL OF THE CALEDONIA.

The steamer Caledonia arrived from New Westminster yesterday evening at 6 o'clock. She brought down 160 passengers and upwards of \$100,000 in gold dust, \$20,000 of which was in charge of Capt. Frain. A great many of the miners had small little piles of the ore stowed away in their blankets, or at their persons, in quantities varying from 100 to 500 ounces. One man had \$5000 wrapped up in his worn and tattered blankets; another was observed at one of the wayside houses, carefully rolling up four well-filled little buckskin bags, evidently containing at least forty or fifty pounds of dust. A good many were known to have sums varying from one to two thousand dollars.

The miners have had a rough time of it on their downward trip, the roads being in a fearful state, with snow and mud.

Pack animals are perishing by whole trains at once; one packer who went in with thirty-seven horses, has only saved seven out of the lot, being obliged to leave his goods along the trail in various places. Fourteen animals lost every one of them. Dead and dying horses were met with at almost every step, some of them standing upright in the snow, just as they had been left by their owners.

The principal houses along the trail, particularly those at Beaver and Williams' Lakes, were crowded to excess by returning miners; it was almost impossible to get even room to sleep on the floors.

Cunningham was still lying very sick at Beaver Lake; he was delirious, and strong doctors were expressed at his recovery. He was well attended to by his friends. He has \$40,000 in dust with him.

Captain Frain is decidedly a popular man; all the miners speak of him in the highest terms.

DASTARDLY ATTEMPT AT MURDER AND ROBBERY.

We learn from a miner who arrived by the Caledonia the following incident: A French trader returning from the upper country on horseback with three and a half pounds of gold in his possession, overtook a man who was lame, on the way between Bridge River and Lillooet, and charitably allowed him to rest himself by riding his horse. On arriving at Lillooet, the Frenchman changed his clothing, and his companion must have observed that he had money in his possession. On standing, they were half-way to the Steadfast landing on Seton Lake, the Frenchman in advance, his *protégé* riding, the former was astonished by hearing the discharge of a pistol-cash. Turning round, he enquired of his companion whether he was joking or in earnest? The reply was that he intended to kill him for his money. He then fired again, and this time the contents of the pistol dropped in the neck of the Frenchman, who dropping his blankets fled from the spot to Lake House. Some miners who were on afterwards said that they had seen the assassin, who appeared very much excited, and told them that he had accidentally shot a man and was going to give himself up. Whether he did so or not our informant had not time to learn, as the boat started immediately. The gold had however, been extracted from the blankets, which were brought on by the miners. The villain who attempted to perpetrate this most diabolical crime, had previously arrived at Lillooet with his benefactor that his name was Marks.

VESSELS IN PORT.—The arrivals in port yesterday were more numerous than for the last few days, and in conjunction with the bright sunny weather which has rather unexpectedly returned after the rainy season was thought to have set in, have given the harbor a very lively appearance. Besides the arrival of the Labouchere and the Caledonia, the fair wind yesterday brought in a number of the "pleasure boats," the *Laurel*, from San Juan, Northern Light from Port Angeles, Alpha and Explorer from Nanaimo, Mary Anne, from Soke, and Kingfisher from Sticken, following each other in quick succession. The *Adelaide*, Cooper, discharging at the H. B. Co's wharf, and the *Ashtore*, at Price's wharf, preparing for sea, also added to the bustle.

VICTORIA THEATRE.—There was a very fair attendance at this institution last night, and on the whole, the performance was creditable. After the rather difficult play of the "Floating Beacon," the audience were entertained in the interlude with some good songs by Miss Lulu Sweet and Mr. Cranshaw, and the recitation by Mr. Thayer of the beautiful piece "Bingen on the Rhine." The evening was ended by the well-known farce of the "Limerick Boy," which never fails in fun. This evening promises to be a capital night, there being no less than three plays on the bill, and Miss Matilda Coates, from the London and Liverpool theatres, will make her first appearance here. Miss Lulu Sweet will appear in each of the pieces, so that taken altogether we may expect something good.

RETURNED FROM STICKEN.—Amongst the passengers by the Labouchere on Thursday night, was C. K. Pryce, Esq., a gentleman of much experience in geological research, and an ex-student of the Government school of mines, Jermyn street, London. He was the projector of the expedition that has penetrated farthest into the interior, and during his progress took bearings at intervals, and has thus the information in his possession requisite for laying down a tolerably accurate sketch-map of a region hitherto regarded as a *terra incognita*. Mr. Pryce is confident of the wealth of the country, but further development is impossible until pack animals are taken up.

POLICE COURT.—YESTERDAY.—Several cases of drunk and disorderly were disposed of with the usual fine. The proprietor of a German boarding-house opposite the Royal Hotel on Wharf street, who had been arrested by officer Shepherd at 2 a. m., was charged with having been drunk and disorderly, and using threats to his wife. The charge being proved, the prisoner, who at the time he was arrested had an unloaded gun in his hand and ammunition on his person, was fined 5s, and ordered to furnish his own recognizance of £10 to be of good behaviour for three months.

FROM STICKEN.—The sloop Kingfisher arrived from the Sticken river yesterday morning. She left the mouth of the river on the 29th August, having been thus sixty-three days on the way. She brings only two passengers and no later news, her arrival having been anticipated by the Labouchere.

Two young men were arrested yesterday on a charge of stealing a turkey. The case came up in the Police Court in the afternoon, but was remanded until this morning.

THE PRINCE OF WALES MEETING.

The meeting called by His Worship the Mayor, on a requisition of a number of citizens, for the purpose of considering the best means of celebrating the arrival of the Prince of Wales at this city, was held at two o'clock yesterday afternoon at the Victoria Theatre. About 150 persons were present on the occasion, and the proceedings were throughout unanimous.

Among the gentlemen who appeared upon the platform, we noticed several members of the Legislature and City Council, and the Mayor present.

His Worship said he had called the meeting on receipt of a requisition signed by 123 of his fellow citizens and 45 students in the colony, and was glad to see so many persons then present. He then requested Messrs. O'Brien and Park to act as his Secretaries. Mr. Burnaby, M. P., proposed the first resolution:

Resolved, That being loyal and patriotic subjects of Her Most Gracious Majesty Queen Victoria, it is the spontaneous and unanimous opinion of this meeting, that a public demonstration should take place on Monday the 10th day of November, to celebrate the auspicious event of the coming of age of His Royal Highness the Prince of Wales.

The mover said he believed the sentiments of the resolution most commend itself to the heart of every one present. He hoped they would all, as jolly Englishmen, make up their minds to eat plenty of roast beef, and thoroughly enjoy themselves on the coming occasion.

Mr. Smithe, M. P., seconded the resolution, which was carried unanimously.

Mr. Cary, M. P., proposed the next resolution:

Resolved.—That the following programme in celebration of His Royal Highness having attained his majority be adopted by this meeting, viz:

1. A general public holiday.
2. The closing of all places of business, public and otherwise, after 10 a. m.
3. A public subscription dinner.
4. A general illumination in the evening.

Mr. Franklin, M. P., seconded the motion, which was carried nem. con.

Mr. Jeffray proposed the 3d resolution, which was carried unanimously.

That in order to effectually carry out the object of the meeting His Worship the Mayor be hereby requested to appoint a Committee of Management.

Seconded by Mr. Cochrane and carried.

The next was proposed by Councillor Stronach.

Resolved.—That a subscription be now opened for voluntary contributions towards organising a fund to enable the Committee of Management to erect triumphal arches, and such other public displays as they may desire.

Carried unanimously.

Major Foster, M. P., proposed the last.

Resolved, That the Committee be requested to draw up an address of congratulation to His Royal Highness on the attainment of his majority, in expression of their loyalty and attachment to his person, and that the Mayor be requested to affix to it the corporate seal of Victoria, and that the address be forwarded to the head of Her Majesty's Government for presentation.

In proposing the above, Mr. Foster said that he hoped before many years to see one of the Princes not only present in the Colony with the fleet, but reviewing one of Her Majesty's armies on Vancouver Island.

Seconded by Councillor Lewis, and carried unanimously.

The Mayor then proceeded to appoint the following gentlemen members of the Committee of Management:

Messrs. G. M. Sprout (Chairman), J. D. Walker (Treasurer), Wm. Cocker, M. P., R. Burnaby, M. P., D. B. Ring, M. P., Lumley Franklin, Wm. Jeffray, J. J. Cochrane, Geo. Cruikshanks, W. A. Harries, Robert Ker, and Councillors Stronach and Lewis; also, Messrs. F. O'Brien and J. Park (hon. secs.).

After the names of the above gentlemen had been mentioned, consideration of the body of the meeting was suspended for the space of some three minutes in the indulgence of the merriest merriment so unexpectedly provided.

When order was once more fairly restored, Mr. Cary proposed a vote of thanks to the Mayor for his courtesy in calling and presiding at the meeting; also to the gentlemen in the body of the house who had so kindly furnished them with amusement.

Aud loud and prolonged applause, the meeting then dispersed.

The Sticken Country.

From a miner who has been prospecting through the Sticken country since the beginning of June, we glean some particulars in reference to the general appearance of that section of our mining regions. The Sticken river, as explored by miners, consists of a main stream (which is the one that has been chiefly prospected) and the North and South Forks. With the leading features of the former our readers have previously been made acquainted, but of the latter, which has not been so much explored, little is known. Our informant ascended the South Fork about 80 miles, through a rough mountainous tract, and reached a comparatively level country, partly open and partly wooded, with plenty of lakes and creeks, and occasional swamps. The scenery on the cañon, which extends nearly the whole distance he ascended, is very grand. In one place the river makes a precipitous plunge of upwards of sixty feet, while the gorge is so narrow that a plank might almost be laid across. There are also two or three other falls, of from 20 to 30 feet in height.

The country on the South Fork swarms with game, particularly bear and mountain sheep; elk, deer, and grouse, are also numerous.

Ascending the North Fork, or what is called the First North Fork, the country is found to be of a less rugged character than that on the lower part of the South Fork. About fifteen miles up it becomes quite level, and apparently very fertile, being in many places covered with grass from three to four feet high, not in swamps but on dry ground.

There are some appearances of volcanic action in the vicinity of the lower part of the cañon. Between it and the main river there is a hill or mountain that has the appearance of an extinct volcano, and quantities of a light porous rock are found, much resembling the pumice stone in the vicinity of Mount Vesuvius. Great cracks or fissures are also seen, extending considerable distances, and of very great depth, a feature invariably found in countries which have been subjected to volcanic action.

Gold is found in all parts of the country, but as yet only in small quantities. There is every probability however, that, as in the Fraser River region, placers will ultimately be found containing immensely rich deposits of the precious metal.

DEPARTURE.—The Albatross, Capt. Henderson, sailed yesterday morning for Barclay Sound.

HOUSE OF ASSEMBLY.

THURSDAY, Oct. 20.

House met at 3.30 p. m. Present, the Speaker and Messrs. Burnaby, Tolmie, Franklin, Cary, Trimble, Cocker, Rink, and Southgate.

NO CLERKS.

The Speaker informed the House that the Clerk was absent, and a Mr. Nesbitt was appointed to fill that office pro tem.

IMPORTANT STATEMENT.

Major Foster drew the attention of the House to a serious infirmity of the subject which had lately taken place in the Colony. A gentleman named Frere, who had been formerly engaged in a solicitor's office in this town, had, after a temporary absence from Victoria, been conducted to the common jail on a plea of insanity, and without trial or evidence, detained in a felon's cell for the space of a fortnight. He brought this matter before the public, because it was on the best terms of friendship with the relatives of the prisoner, by whom he learned he had been incarcerated.

The Attorney General said that if this had happened it was a matter that might be rectified by bringing the case before the Chief Justice. It was not for the discussion of the House, before the Executive had been consulted.

Mr. Trimble rose and said it was all a mistake. Mr. Frere was his patient, was at full liberty, quite well, had never been in jail, and was shortly going to England.

The matter then dropped, but subsequently Dr. Trimble apologised for his contradiction. He was informed that Mr. Frere had been detained one night in jail. [This last statement is correct.] He was on the best terms of friendship with the relatives of the prisoner, by whom he learned he had been incarcerated.

Mr. Cocker introduced a new petition from the Gas Company. Laid on the table.

House then adjourned until Friday at 3 p. m.

FRIDAY, Oct. 21.

House met at 3.15 p. m. Present, the Speaker and Messrs. Tolmie, Cary, Burnaby and Trimble.

On the second reading of the bill to prohibit trading on the Sabbath, was postponed until Monday next.

Mr. Tolmie then asked leave to introduce on Friday next the following resolution: That, considering the extensive forest of valuable timber growing on Vancouver Island, of the safe, commodious, and easily accessible harbors contiguous thereto, and of the general ignorance prevailing thereof of the interests of the investment of capital in saw mills.

Resolved, That His Excellency the Governor be respectfully solicited by proclamation, to order that grants of timbered lands be made to parties establishing saw mills thereon.

House in Committee upon the Road Bill. The only section that created any discussion was that providing what sum of money should be considered equivalent to one day's labor. The bill provided that 3d. should be the amount.

Mr. Helmeke proposed an amendment that the substituted clause should be considered that they should be placed the amount low, that people might pay the money instead of contributing labor. He thought the money might be more readily obtained.

Mr. Cary detected in the amendment an attempt to ease the operators, and proposed a re-amendment making the amount 6s, which was carried.

After the passage of the section, the Committee reported progress, and the House adjourned until Monday next, at 3 p. m.

EXTRAORDINARY ASSAULT CASE.

Just when the magistrate was rising from the bench yesterday morning, two prisoners were brought into the Police Court by officer De Cecil. One of them was a man apparently 50 years of age, the other a light-built lad of eighteen. It seems that they had been fighting, and each arrived simultaneously at the Police Barracks, to procure a constable to arrest his antagonist. Mr. Pemberton ordered the clerk to enter a charge and cross charge.—Sam. Herard vs. Henry D. Parr; and Henry D. Parr vs. Sam. Herard. Herard, being sworn, said: I was in my house, when I heard a noise; I went out, and saw the defendant take away some of my bread. I told him to stop, and he said he should do as he pleased. I again told him not to do so, when he threatened to put me in my water tub. I said: 'What! in my own water tub?' He said: 'I do—I do old Jew, I'll punch your head.' He then came into my room and knocked me about in his head-dreadful state (exhibiting a face with a few scratches, some blood, and considerable dirt upon it). Cross-examined by defendant—I did not threaten to use a hatchet, nor to spit your bloody head open. By the Bench—I have no witness. The witness for the defence, who was reversed—Herard becoming defendant. H. D. Parr.—There is no fence between our premises; there were a few bricks in the yard, to which we had a mutual right; I should say they belonged to Mr. Levi, the landlord; while I was using them to make a foot-way, the defendant began abusing me; I said: 'you do—old Jew, if you don't shut up I'll put you into your water-tub.' He then got a hatchet; he came towards me, I backed, and caught his arm; he then took me by the hair of the head, and in the struggle subsequently tried to get me by the neck of the neck. By the defendant—I refused to give back the bricks; I was not above you on the bed in your house, when I struck you. A neighbor who was called as a witness, said that about breakfast time he heard the two persons quarrelling, and he saw the defendant with a hatchet in his hand, and heard him say: 'If you don't go away, I'll spit you in two with the hatchet.' A short time afterwards he heard a row, and someone calling 'help! murder!' Herard—'That was me.' [Laughter.] Parr, also, closed his evidence with the expression, 'Parr, of the Bench.—What Herard says is all a lie. Another person was called, who corroborated the first concerned witness' evidence. Mr. Pemberton said it was very evident that both parties were quarrelsome persons. Herard, however, was an older man, and a more serious assault had been proved against him. He therefore sentenced him to 25 fine, or two months' imprisonment. Parr to 50s, or one month.

Hill Diggings.

EDITOR BRITISH COLONIST.—My attention has been drawn to an article in yesterday's issue, signed "Cubelyn," wherein a miserable attempt is made to establish the fact that we have no hill diggings in British Columbia; and where said "Cubelyn," has blushed up to the eyes at the complete ignorance of the experienced miners when they have spoken to him of hill diggings. Most men! Tell your hat over your eyes the next time you hear the old hands talk about hill diggings. But even if this, as it is of some importance to the miners who are here and to those who may come here, and to the colonies at large, I propose to "Cubelyn" to discuss the matter in the columns of the Colonist, with your permission, I will be glad to do so.

I begin by saying that "Cubelyn's" article in your issue of Wednesday, is a nonsensical, garbled misstatement of facts, and I dare him to prove the contrary.

We have hill diggings in British Columbia!

Yours,

W. DOWDIE.

ON HER WAY TO THE CAPITAL.—The brig Energy, Capt. Gray, 20 days from San Francisco, is anchored in Royal Roads, on route for New Westminster, with a full cargo. She sailed on the 5th inst., but was caught in a storm, losing some of her sails and her quartern, and was obliged to make for port; she sailed again on the 10th inst., having lost her sails and dense fog, and the way to the port, the captain being unable to take any observation for fifteen days.

SUMMARY COURT OF CIVIL JUSTICE.

Yesterday morning, before Chief Justice Cameron, judgment was delivered in the case of Parker vs. Semple. His Honor decided in favor of the plaintiff, and placed the damages at \$100. Several minor suits for debt were summarily adjudicated.

FROM NANAIMO.

The schooner Alpha and Explorer arrived yesterday from Nanaimo direct. They bring 75 and 60 tons respectively of the best quality of coal to R. Broadbent, Union Wharf.

Peace River.

Mr. Baale and four others left Antler Creek in the latter part of September, and came down to Alexandria. From thence they proceeded up the Fraser river to Fort George, then one mile to Stuart River, which they ascended ten miles to Fort Floyd, thence 100 miles across an open prairie of fertile soil—made with animals in six days to Fort Games and Lake of the same name, out of which Peace River flows. The river takes a bend to south-east, then due north. They crossed this bend (about 20 to 25 miles) in one day. They there struck the first bar and made their first prospect on a shovel, from which they got 87 and 3 bits. They made a rocker, went to work, and in four days washed out \$1,487. Having only four days grub they came back to Fort George and got enough provisions to take them down to Alexandria, where they bought a larger supply and have returned to Peace River. They are told by the H. B. C. people and the Indians that the winters are milder, being a less elevated country than Cariboo and more of open prairie. They report that in crossing the 100 miles, they encountered a number of veins of decomposed quartz and a great many ravines and gulches, having every appearance of containing rich diggings. The tract lying in the bend of the river has also the strongest signs of being a rich gold-bearing country. Owing to the short stay the prospectors were compelled to make, on account of the small quantity of food which they had carried with them, they did not attempt to examine any other part of the river or country; in fact, they were so much pleased with their success on the first bar which they struck, that they have not the heart to look for more.

While they were clearing for their winter's stock of provisions they heard reports of other parties having started for the same region, but they had neither seen nor heard anything of any such, during their journey.

The explorers speak in the highest terms of their discovery, placing it altogether before the Cariboo region, on account of its being much more accessible, having a much milder climate, and longer season, and being so much more easily worked. They are confident also that it will turn out very rich, judging from the favorable experience they have already had of its productivity.

They consider that had they been supplied with provisions, they could have taken out \$250 per day to the man, working with rockers only. The gold is described as flakey, about the size and shape of cucumber seeds, bright colored, and of very fine quality. They think it will assay about \$1750 per ounce. Mr. Forrester, one of the miners of Mr. Baale on Williams Creek, is now in the city; he intends building two boats of six tons each, with which he will start for the Peace River in the season of 1883. The boats are to be used to transport provisions from Alexandria or Quesnelle to Fort Floyd, or Stuart's Lake, from which place they will be packed on animals across the one-hundred-mile prairie to James Lake, out of which the Peace River flows.

ALL HALLOWS OR ALL SAINTS.—An ecclesiastical festival in honor of the whole hierarchy of the Roman Catholic saints, and, by a metonymy, the first day of November, that being the day on which the festival is held. All Hallows is the old English form of the name, and is still extensively though not classically in use. High Mass having been appointed in the Church of Rome as a chief observance of the festival, the name of All Hallows took the form of All Hollow Mass, in exactly the same manner as the festival in the Anglican Church took the name of All Saints' Mass, or All Saints' Day. And this designation All Hollow Mass—some times in the abbreviated form of Hollow-mass—is still retained in the popular phraseology of the northern counties of England. The original festival decidedly appears to have been heathen; and it was transferred to the Church of Rome on the occasion of the Roman Pantheon, or temple of all the Pagan deities at Rome being set apart to the purposes of Roman Catholic worship, and dedicated to the whole hierarchy of Roman Catholic saints. The whole of the festival, or the 31st day of October, is the result of long and close observation in a great number of cases, and has been invariably successful where other medicines or treatments have failed. It is a remedy long required by the public.

Price—One Dollar per Bottle.

For sale by Druggists everywhere.

NOTICES.

In the matter of the Estate of WILLIAM McDONALD, deceased.

SALE OF SECTION SIXTY-SEVEN, IN Victoria District, 180 acres of Land, with Improvements.

Whereas, by an Order made by the Honorable David Cameron, Chief Justice, on the 5th day of October, A. D. 1882, the undersigned was empowered to sell at Public Auction to the highest bidder, all the lands and improvements, to be given in the newspapers, all that piece of Land known as Section Sixty-seven, in Victoria District, bounded on the East by the late William McDonald, deceased, intestate.

This is therefore to give notice that said Land will be sold at Public Auction, to be held at the Victoria Auction Rooms, on Thursday, the 13th day of November next, at the hour of noon, when terms of sale will be made known.

THOS. G. WILLIAMS, Official Administrator.

P. S.—Persons desirous of information in regard to this, improvements, quality of land, etc., etc., are requested to call upon the Receiver General, or the Court, at his office, in the Court House. Oct 31st

NOTICE.

THE MEMBERS OF THE CONGRE-

gation (Emancipators), as well as other individuals, who are desirous of taking part in the celebration of the 10th days and Sabbaths in Smith's building, on Government street.

Seals can be secured of David Shipper, on Yates street, near Wharf, or of the undersigned.

A. HOFFMAN, Secretary, Corner Yates and Government streets.

NOTICE.

THE ATTENTION OF CONSUMERS

of gas and of gas fitters is directed to the fact that the regulations of the company, copies of which may be obtained on application at the Company's office, 107 in Victoria, bounded on the East by the late William McDonald, deceased, intestate.

By order of the Board of Directors C. W. R. THOMPSON, Secretary.

Removal.

DURING THE ERECTION OF MY new brick building on Government street, my business will be carried on in Fort Street, near the corner of Government street, from 11 a. m. to 4 p. m. W. M. SHARRY, Chemist and Druggist, Victoria, V. I., Sep. 16, 1882.

Notice of Removal.

MR. DAVID FROM ENGLAND (MEMBER of the Royal College of Surgeons and Licentiate in the Society of Apothecaries, London), has removed to his New Office, next door to the Club Hotel, and opposite his former office, Government street.

NOTICE.

I HAVE THIS DAY APPOINTED Mr. J. J. Langley, as my Agent, to sell at Public Auction, in Vancouver Island and British Columbia, for the sale of the celebrated Class. Fairé Champagne, and also the first Gold Medal at the General Exhibition, Paris, 1875, Cognac, &c., Imported by J. J. Langley.

Victoria, V. I., Sept. 11, 1882.

Mr. Chas. Farré supplies the Emperor of the French and the Queen of Spain with his Wine, and obtained the first Gold Medal at the General Exhibition, Paris, 1875.

State of

MEDICAL.

THE WORLD'S FRIEND!
Holloway' Ointment.

A Cure for Piles and Fistulas.

Inflammation of sensitive parts, piles, fistulas, and such like diseases may be presently relieved and ultimately cured, by the proper and diligent use of this cooling and healing Ointment, whose action should first be noticed in the rectum. The cure of Piles: ere many days have elapsed the anxious patient will experience a wonderful degree of ease from this treatment, and ere long he will be cured of his disease, and all ages.

Coughs, Colds, and Asthma.

These complaints of the chest come up with alarming frequency. The Ointment should assiduously be rubbed on the chest, and the throat, and down the shoulders, when the violence of all symptoms has gradually given way, the breathing become longer and the oppression less. These medicines are more useful in chest complaints, none can be used with equal safety and certainty. Both Piles and Ointment are accompanied by very clear and simple directions for using them.

"A Man who refused to have his Leg off,"

"From the *Kilrush Advertiser*, June 2d, 1860.

"I have been afflicted with Rheumatism, said in the Board Room at Kilrush, and know of no relief but that afforded by the Pills and Ointment, and was actually torn out of my bed, on my way home to Kilrush, and was so much afflicted that I was unable to get up, as he said, it could not be worse with him. The man, said Mr. Cox, became by their use as sound as a bell, and he said he would recommend the Pills and Ointment will cure any wound, sore, or ulcer, however long standing, if properly used according to the directions."—

Gout and Rheumatism.

The essence of these diseases lie in the blood, which has, floating through each vessel, the pain-producing poison, which, on contact with the inflamed surface, produces the pain, and the morbid action of the blood is so elastic enough about the joints so characteristic of gouty disease. The philosophy of cure consists in the removal of the morbid action of the blood, and is rapidly purified by the use of the Pills. The Ointment, when rubbed upon the skin, penetrates to the joints, and the morbid action of the blood is removed, and the Pills, and soon effects a cure.

The various kinds of drops, whether windy or watery, are not to be used in any inflammation through the blood vessels or lymphatics, or depend on the inflamed state of some secreting surface. Holloway's remedies, of which the efficacy cannot be doubted, are not to be used in such cases, but are to be used in all eruptions and secretions, with a power that no drops, however hygroscopic, can long resist. They regulate the proper flow of blood, and give the particles of matter a chance to come out high, and without pain or injury;—they thoroughly regenerate every low system, yet potent as they are for good, they are powerful less for evil. They do not cure, but they cure less for evil. They are nearly and certainly

Bad Legs, Bad Breasts, and Old Ulcers.

This invaluable ointment was never known to fail in the cure of any wound, sore, or any ulcer, as can be proved by innumerable testimonials from persons who have been discharged from Hospitals.

[illegible]

ASTHMA always cures. It overcomes the spasm of the bronchial tubes, and removes all difficulty of free expiration at once. Removes all difficulty of free inspiration at once.

BROUCCHE'S readily yields to the Expecto-rant, and as the inflammation which extends through the lungs, subsides, the patient is enabled to breathe at once the cough and pain subside.

It is the only medicine which cures the asthma, no remedy on earth has ever been found so effective. It subdues the inflammation, and restores the patient to the full competency of breathing, and produces the expecto-rant, whereby all irritating and obstructive matter is removed from the lungs.

WIND PICOUGH is promptly relieved by this medicine, and the patient is enabled to breathe at once, and greatly mitigates the sufferings of the patient.

It is in ALL PLEURISY COMPLAINTS, in Croup, Pleurisy, and all the diseases of the chest, and is especially valuable, and may be especially commended to Ministers of the Gospel, who are often afflicted with it, and strengthening the organs of the voice.

This EXPECTO-RANT and all of DR. D. J. AYER'S Family Remedies, are sold by all the Druggists, and by H. L. HANCOCK, Boston, of whom may also be had the "Expecto-rant," and the "Family Remedies." Hear the "containing, besides a valuable Calendar, a Catalogue of Diseases, together with the symptoms by which they may be known, and the proper course to pursue in their cure."

MR. B. GILPIN LACY,
M. R. C. S., L. S. A. LOND.,
Late Assistant Surgeon of E. I. C. S.,
